- I Love this place.
- LGHS has a very welcoming environment for staff, students and parents. LGHS offers a lot of support and is also a great place to work.
- Everyone here at LGHS is laser-focused on helping students succeed
- The campus is nice and clean. Students are respectful, for the most part.
- Le Grand High School is a great place to work and great school for students. Great environment.
- good school
- Graduated at this high school and can say positively a lot more resources and help for students now compared to my ages
- I feel that the environment is a positive and supportive. I am glad to work here.
- LGHS offers a good environment to work in since it is a small school and you have the opportunity to know most of the staff.
- NA
- This school is very open to ideas of new programs or events to try with students i.e. CAASPP Academy at UC Merced
- All the staff works together well to make a great environment for students
- great funding school to promote those items that are working well at the moment
- Our school does a good job of connecting with students who may be dealing with outside social/emotional needs. Students have a variety of resources they can utilize to help them be successful both in the classroom and after school.
- Le Grand has a strong community feel where students, regardless of their friend group, are at least aware of one another.
- Most of the students are good. It's nice we have increased the number of staff we have in the mental health/social emotional counseling department.
- This is a very welcoming place for student & teachers are supportive of each other

25. Please feel free to contribute any other critical comments.

- effective communication is still an issue
- None
- We need to focus more on treating students more fairly when it comes to discipline. Teacher duties (outside of sports) are not fairly distributed amongst staff.
- None at this time.
- Overall great small community and definitely bringing my kid to this high school.
- At our school we need to prioritize creating diverse elective courses that promote academic, career, and artistic growth.
- n/a
- None that come to mind.
- NA
- The same student's are out of class roaming around all the time when they should be in class receiving instruction.
- Standards alignment and assessment is not reflective of students knowledge and learning.
- need to promote other CTE classed beside AG and Medical. Would like to see promoting more

dual enrollement students participate and number or enrolled students to increase. Also would benefit those with Aquatics involved in this program. Need more support from teachers to guide and support student for higher education. More higher education involvement, more counselors and resources for parents to be involved not just FAFSA nights. Event more parents to have a safe space to come and contribute to their child's education. Parent Education classes.

- I think there needs to be more support for out teachers

- At our school, although there is an emphasis placed on ensuring students have the tools and resources needed to pass classes, I feel that something is lost in the accountability portion of the educational system. There are few consequences for both behavioral issues and lack of educational involvement. Providing additional time to complete assignments for certain students creates some issues of fairness and equity for students who complete there work on time, every time.

- Too little communication. Kids are gone for extracurricular activities and we are not told. The same people have to cover for missing faculty. The kids that can be discipline issues are rude with certain teachers and can get away with it. They are rude to another staff member and they are punished, even removed from class or thrown out of school. Several teachers just play movies all period or rely on the textbook all period and there's no effort to change things.

- Communication/Expectations between Leadership and Staff can sometimes be vague or inconsistent

LCAP and CA Dashboard Local Indicator Data

% of staff that report the school (s) as safe or very safe (Item 11 12)	87.5%
% of staff that report high connectedness with the school (s) (Items 7, 8, 9)	64.1%
